

How to redeem a gift card

A gift card adds credit or game currency to your account. Redeem it only on the platform's official site or app.

In this manual

1. Before you start
2. PlayStation (PSN)
3. Xbox and Microsoft
4. Steam
5. Nintendo eShop
6. Roblox
7. Riot Games (League of Legends, VALORANT)
8. Battle.net (Blizzard)
9. Razer Gold
10. PUBG Mobile (UC)
11. After you redeem

Before you start

- Sign in to the account in the card's region. If you aren't sure, see [how to check your region](#).
- Copy the code with the **Copy code** button or type it exactly as shown. See [problems with the code](#).
- Open the platform's official page yourself; don't use links from unknown messages. See [Security](#).

PlayStation (PSN)

A PlayStation card code has 12 characters (letters and digits). Codes with 10 digits are discount codes used at checkout, not vouchers. The amount is added to your PlayStation wallet.

- **PS5:** open **PlayStation Store**, choose the ... (three dots) menu at the top of the screen and choose **Redeem Code**.
- **PS4:** open **PlayStation Store** and choose **Redeem Codes** at the bottom of the menu.
- **Web:** sign in at store.playstation.com, choose your profile picture (avatar) and choose **Redeem Code**.
- **PlayStation App:** open PlayStation Store in the app, then the menu icon, and choose **Redeem Code**.

1 Sign in to the PlayStation account in the card's region.

2 Open **Redeem Code** by one of the routes above.

3 Enter the code and choose **Redeem**, then confirm.

What it adds: credit in your PlayStation wallet, which you use for games, add-ons or PlayStation Plus.

Xbox and Microsoft

An Xbox code has 25 characters (five groups of five). The amount is added to your Microsoft account.

- **Web (the simplest):** open xbox.com/redeem or redeem.microsoft.com, sign in with your Microsoft account and enter the code.
- **Xbox console:** press the Xbox button, choose **Store**, press the **View** button to open the side menu and choose **Redeem**.
- **Xbox PC app:** choose your profile picture (gamerpic), then **Settings** and **Redeem**.
- **The Xbox mobile app** can't redeem codes.

What it adds: balance on your Microsoft account, which you use for games, apps and Xbox subscriptions.

Steam

- 1 Sign in to Steam in the desktop app or at store.steampowered.com.
- 2 In the app open the **Games** menu and choose **Redeem a Steam Wallet Code**. On the web you can go straight to store.steampowered.com/account/redeemwalletcode.
- 3 Enter the code exactly as shown and choose **Continue**.

What it adds: funds in your Steam Wallet, in your account's currency. Use them for games, software and in-game items.

Nintendo eShop

Use the 16-character Download Code, without hyphens (not the Control Number).

- 1 On your Nintendo Switch or Switch 2 open **Nintendo eShop** and choose your user.
- 2 On the left side of the eShop choose **Enter Code** (Americas) or **Redeem Code** (Europe).
- 3 Enter the 16-character code without hyphens and confirm.

What it adds: credit on your Nintendo account for eShop purchases. You can also redeem on the web at ec.nintendo.com/redeem.

Roblox

- 1 In a browser open roblox.com/redeem and sign in to your Roblox account.
- 2 Enter the code exactly as shown.
- 3 Choose **Redeem**.

Redeem the card in a web browser, at roblox.com/redeem.

What it adds: Robux or Roblox credit, depending on the card. Cards work worldwide and convert to your local currency. It shows in your account balance.

Riot Games (League of Legends, VALORANT)

- 1 Sign in to the game client with the Riot account in the right region.
- 2 **League of Legends:** open **Store**, then **Purchase RP** and **Prepaid Cards**. **VALORANT:** open **Store**, choose the VP icon, then **Prepaid Cards & Codes**.
- 3 Enter the code and confirm.

 Riot prepaid cards are redeemed only in the game client, not on the website.

What it adds: Riot Points (RP) for League of Legends, or VALORANT Points (VP) for VALORANT, depending on the product. RP and VP cards are separate and locked to a region or server. Check the product name before you buy.

Battle.net (Blizzard)

- 1 Sign in to the Battle.net account in the right region.
- 2 In the Battle.net app choose the profile icon (top right) and **Redeem Code**. On the web open **Account Overview** and choose **Redeem a Code**.
- 3 Enter the code and confirm.

What it adds: Battle.net balance for Blizzard games and items. A Balance code must match the Shop currency, which follows the country of residence in **Account Details**.

Razer Gold

- 1 Open gold.razer.com and sign in to your Razer account.
- 2 Choose **Reload Now**, then **Razer Gold PIN**.
- 3 Enter the PIN and complete the two-step verification.

What it adds: Razer Gold in your wallet, which you use in games and partner stores. A PIN reloads only a wallet of the region it was bought for.

PUBG Mobile (UC)

- 1 Open the Midasbuy page for redeeming codes.
- 2 Enter your **Player ID** and check that it is correct.
- 3 Enter the code and confirm.

What it adds: UC (the game currency) on the account with that Player ID. UC is added at once and can't be moved to another account.

After you redeem

The credit shows in the platform's balance within moments. If the code isn't accepted, see [troubleshooting](#).
