

Subscriptions and in-game currency

Some products don't add money to a wallet, but subscription time or a game's currency. The product page says what a card adds (months, days, Robux, UC, RP).

Need help? Contact support: <https://amiga.gg/en/help/contact>

In this manual

1. What products add
2. Xbox Game Pass
3. Discord Nitro
4. Robux
5. PUBG Mobile UC
6. Riot Points (RP) and VALORANT Points
7. Time, stacking and expiry

What products add

Product	What it adds	Where you redeem
Xbox Game Pass	Subscription time (months or days)	Microsoft account
Discord Nitro	Nitro subscription time	Discord account
Robux	Robux or Roblox credit	Roblox, in a browser
PUBG Mobile UC	UC in the game	Player ID
Riot Points (RP)	RP for League of Legends	Riot account

The redeem steps are the same as for [gift cards](#): open the code redeem option on the official platform and enter the code.

Xbox Game Pass

- 1 Sign in with the Microsoft account of the right region at xbox.com/redeem or redeem.microsoft.com, or open **Redeem** from the **Store** on a console.
- 2 Enter the 25-character code and confirm.
- 3 The time is added to your Game Pass subscription.

 Total subscription time is limited to 36 months; redemptions above the limit are refused. Codes of a different tier convert at a ratio, and the conversion is final. The current tiers are Essential (formerly Core), Premium and Ultimate. Check the tier on the product page before you buy.

Discord Nitro

Open Discord, sign in to your account and go to **User Settings > Gift Inventory**, then redeem the code. Some partner promotions come as a link you open instead of a code. If you already have an active Nitro subscription, check how the gift affects your current subscription.

Robux

Redeem the card in a browser, at roblox.com/redeem. Roblox cards work worldwide and convert to your local currency. After you redeem it, the Robux or credit appears in your account balance. Robux can be used only on the account where they were redeemed.

PUBG Mobile UC

UC is added to the account identified by the **Player ID**. Before you confirm, check that the Player ID is yours: UC added to a wrong ID can't be moved.

Riot Points (RP) and VALORANT Points

Riot Points (RP) are used in League of Legends and TFT. VALORANT has its own currency, VALORANT Points (VP). RP and VP cards are separate and locked to a region or server ([region](#)). Redeem them only in the game client, not on the website, and check the product name before you buy.

Time, stacking and expiry

- Products in days or months add time. If a subscription is active, the platform decides whether the time is added after it or replaces it.
- Some platforms limit how much time can be stacked with codes.
- Some codes have a deadline for redeeming. Don't leave them for long; redeem them as soon as you get them.
- Redeemed game currency can't be returned and can't be moved to another account.
